

REMARKS

In responding to the notice, Applicants noted an error in the dependency in claim 24, which is corrected herein. Applicants suppose the Examiner will be pleased with this change, since the Examiner would otherwise have had to insert a rejection in the next office action, since the claim depended on itself.

In any case, Applicants are astonished that the Examiner issued this notice, given how closely related the new claims are to the existing claims and the art.

The following is an annotated version of the new claims showing where they are supported in the spec and drawing

| CLAIM RECITATION | EXAMPLES OF WHERE RECITATION MAY BE FOUND IN SPEC OR DRAWINGS?¹ |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|
| 23. A method for presenting simulcast information, the method comprising executing operations on at least one user local data processing device, the operations comprising: | simulcasting is discussed throughout the specification, e.g. (a) bottom of p. 3, and original claim 1 |
| o receiving audio-visual information; | Fig. 1 showing audio visual information coming from TV Broadcaster 5 |
| o detecting at least one tag in the video information relating to at least one website simulcasting supplemental information relating to the audio-visual information; | Fig. 2, tags are shown in the transport stream; spec bottom of page 6 et seq.; spec. p. 9, line 3 |

¹ The items in this column are illustrative examples of where the limitations are supported in the application. There may be other parts of the spec that also illustrate them.

REMARKS

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------|
| o retrieving the supplemental information prior to a need for display of such information; | Spec at p. 8, second full paragraph, lines 3 et seq. |
| o marking the supplemental information for synchronized display with the audio-visual information; | Spec. p. 10, line 4 |
| o storing the marked supplemental information; | spec. p. 10, line 4 |
| o generating and displaying a list of stored supplemental information associated with the audio-visual information; | Fig. 4; Fig. 5 ref# 160 -- spec. p. 10, line 9 |
| o receiving a choice indication responsive to the list; and | Spec. p. 10, line 10 |
| o simultaneously presenting the audio-visual information synchronized together with at least part of the supplemental information, responsive to the choice | Fig. 5, ref. # 170 |
| 24 wherein the audio-visual information and tag are received in MPEG format | Fig. 3, ref # 13 |

The new independent claim incorporates limitations similar to those discussed with respect to claim 1. The arguments offered for claim 1 are accordingly applicable.

Claim 23 also adds specific limitations, such as that the supplemental information is retrieved *prior to a need for display* of such information, that are not taught or suggested by the reference.

Any other points of argument relevant to the reference and the new claims are considered moot with respect to the foregoing. Applicants reserve the right to respond to advance such additional arguments at a later date. No arguments are waived and none of the Examiner's statements are conceded.

REMARKS

Please charge any fees other than the issue fee to deposit account 14-1270. Please credit any overpayments to the same account.

Applicants respectfully submit that they have addressed each issue raised by the Examiner — except for any that were skipped as moot — and that the application is accordingly in condition for allowance. Allowance is therefore respectfully requested.
